Move from automation of API / CLI to automation of UI

Micro Focus RPA

Where two powerhouse products come together in a single product

How Micro Focus RPA Works

STUDIO

ORCHESTRATION

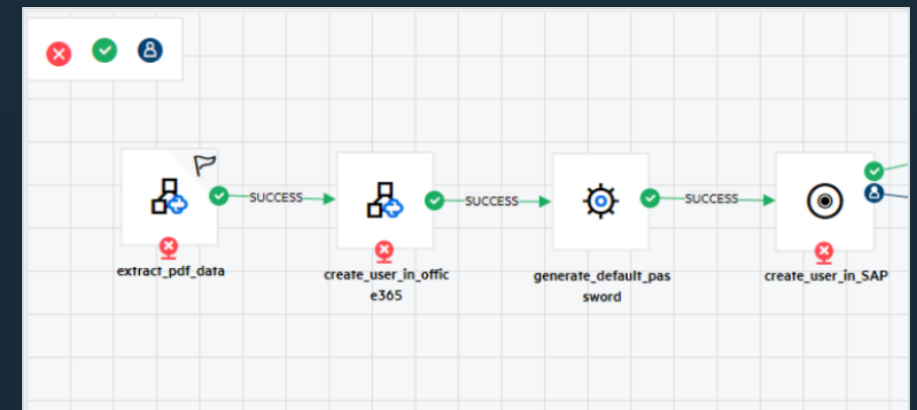

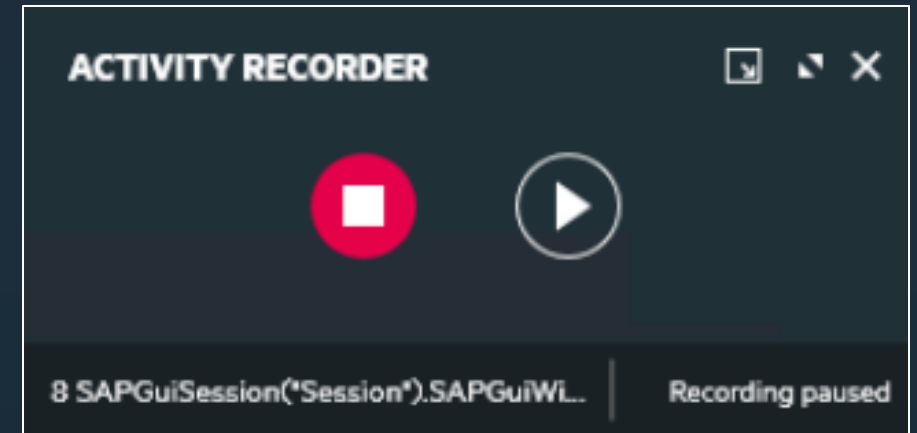

ROBOT

Studio

Unified Web UI

Combine UI and API

Central Orchestrator

Audit log

Encrypted, role-based credentials

Robots

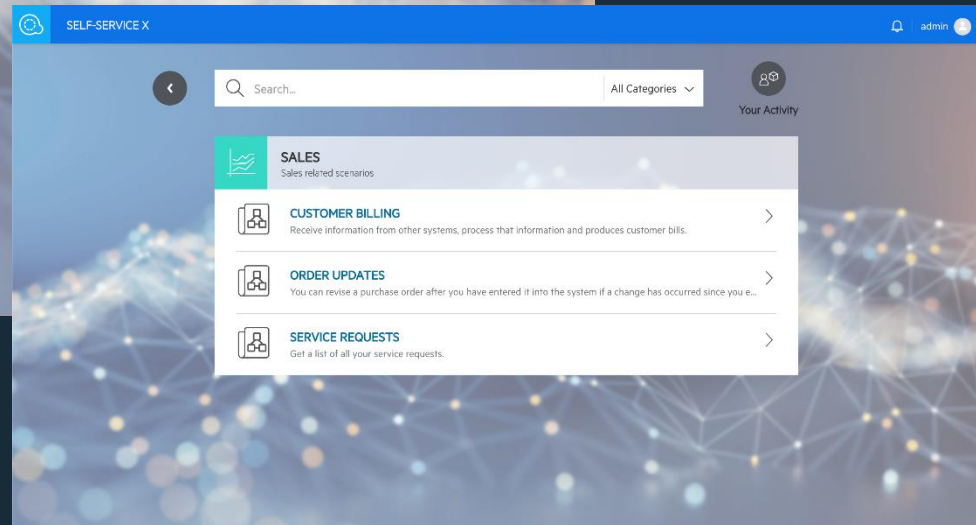

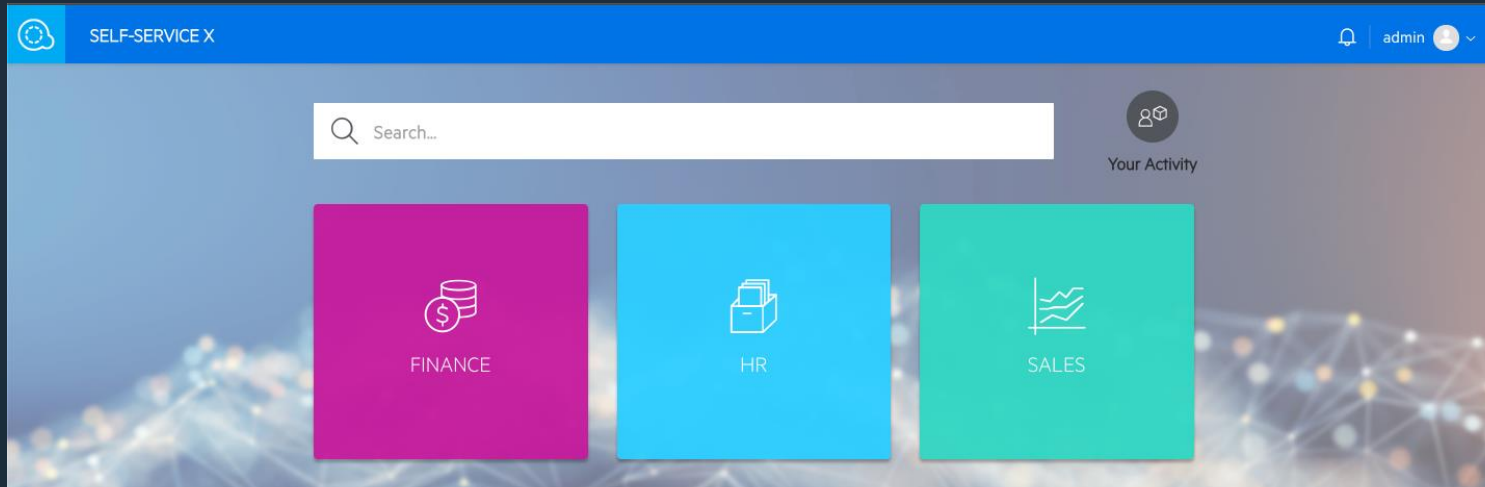

Pool of resources

Central queue

Robot has skill

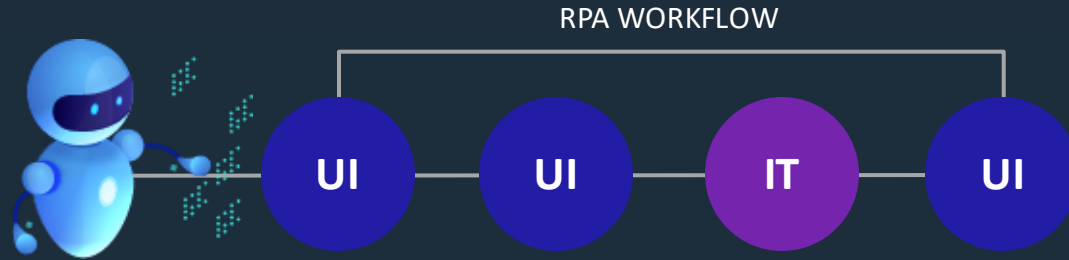

Self Service Portal

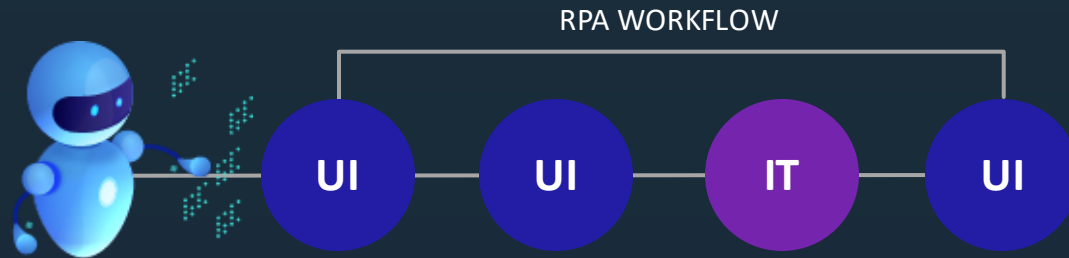

Licensing

Concurrent licensing - Only pay for what you use

An RPA workflow consists of UI and IT operation automation steps.

When the workflow runs, it uses a license.

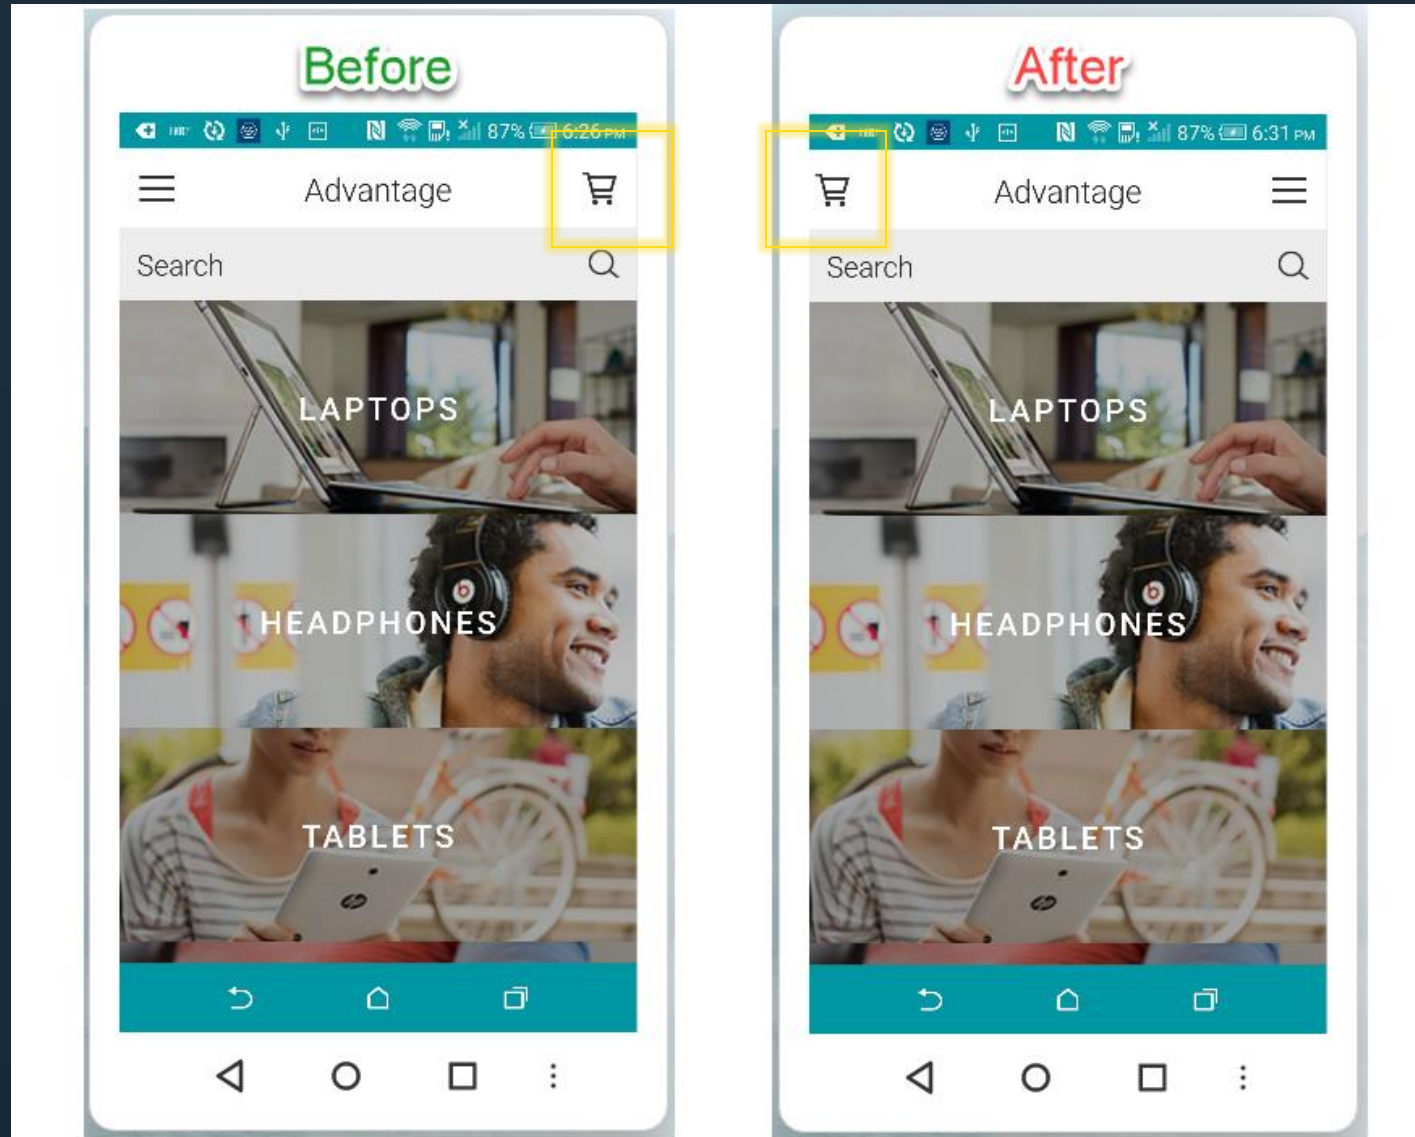

Additional licenses are required when robots work in parallel

Let see example

New employee onboarding

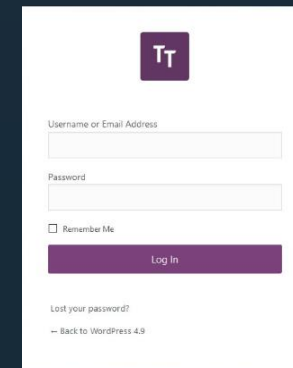

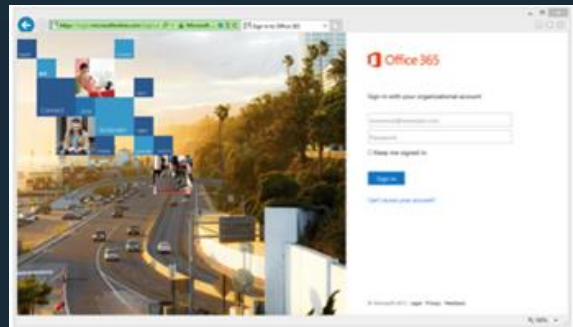

How can find the difference

Adding AI to record and play capability

What if we could automate the business process as a **human** (vs. a machine) “sees” it?

DEEP LEARNING IS SWEEPING ACROSS INDUSTRIES

INTERNET SERVICES

Image/Video classification
Speech recognition
Natural language processing

MEDICINE

Cancer cell detection
Diabetic grading
Drug discovery

MEDIA & ENTERTAINMENT

Video captioning
Content based search
Real time translation

SECURITY & DEFENSE

Face recognition
Video surveillance
Cyber security

AUTONOMOUS MACHINES

Pedestrian detection
Lane tracking
Recognize traffic signs

The Artificial Intelligence composing emotional soundtrack music

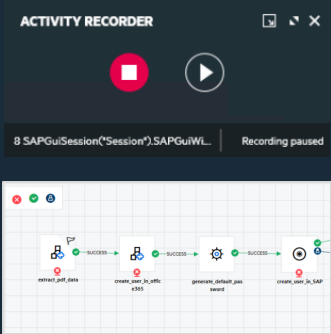

Let's Summarize

What differentiates Micro Focus RPA

Easy-to-use design studio

An intuitive interface to record UI actions and design RPA workflows, visually or with code.

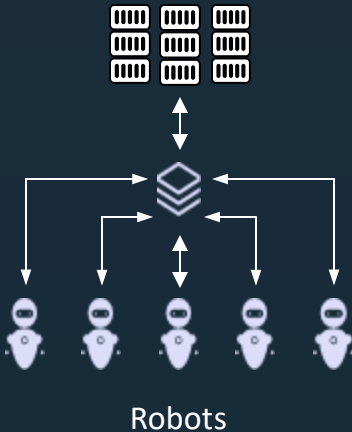

Cross-platform connections

One product that combines UI actions with IT operations to automate business processes.

Scalable robots

Worker-queue-based architecture to scale up or down.

Simple licensing, cost-effective pricing

Concurrent licensing—pay for what you use

Thank You.
